Where 12+ Acres of Central Greens and Playgrounds nurture *Infinite Shades of Green*

# Design Philosophy

---

Godrej Park World is a unique integrated development meticulously crafted around a resilient landscape centerpiece, known as the 12+ Acre Central Greens & Playgrounds. The fundamental concept of this landscape is rooted in the principles of abundant natural beauty and seamless harmony and coexistence with nature. This environment encourages residents to Live, Work, Play and Relax around nature.

At the heart of the landscape design framework lies the restoration of an existing stream and retention of existing trees, that ensure the preservation of the surrounding ecosystem, nurturing a diverse array of flora and fauna.

This thoughtfully designed landscape caters to a variety of recreational needs, offering both active and passive spaces for enjoyment and relaxation. The western edge of the stream features a barbeque zone and a camping area, creating a serene passive recreation loop. This loop extends further into a 'meadow walk' adorned with vibrant floral plantations on the opposite bank of the stream, leading visitors to a nature's education zone. Here, individuals can engage and learn about various species of plants.

A central play corridor serves as a vital connection between spaces designated for both children and adults, seamlessly extending into multipurpose 'maidaans' and the Rolling hills. These versatile areas are designed for a multitude of activities, including sports, picnics, meditation, and more.

The landscape features amphitheater-style seating integrated into the rolling hills and strategically placed around the maidaans, offering excellent views while blending harmoniously with the natural surroundings.

In addition to ensuring essential circulation, the central avenue and adjacent bioswales direct stormwater towards the stream, supporting sustainable water management and improving connectivity across the township. This integrated circulation network encourages non-motorized, environmentally friendly modes of transportation within the community.

The avenue culminates at a vibrant water plaza, which features multiple modules that cascade towards the stream, fostering a deeper connection between residents and nature.

At the eastern edge of the stream, an urban deck enhances the retail street experience and serves as a welcoming spillover space for visitors, offering an initial glimpse of the stream and other landscape features from an elevated vantage point.

Godrej Park World presents a holistic living experience that artfully intertwines sustainability, recreation, and community within its vibrant landscape, making it an ideal choice for everyone seeking a harmonious lifestyle amidst nature.

Crafted with exceptional quality,  
echoing the timeless elegance of

*Infinite Shades of Green*

High-quality, certified steel helps build strong and earthquake-resistant structures.

- Opting for Steel conforming to IS 1786. Also, Opting for Steel conforming to IS 13920 for earthquake shock resistance.

Using a higher grade concrete to ensure maximum core strength.

- Where design requirement is of grade M30, Godrej properties procures Grade M35 for higher strength

Waterproof chemical coating upto a height of 1.5m in shower areas of washrooms, 5 times that of industry standards.

- 2 coats of single component – synthetic rubber based elastomeric waterproofing coat provided to all wet areas.
- While the industry standard for chemical coating is limited to a height of 0.3 meters, Godrej Properties provides waterproof chemical coating up to 1.5 meters in shower areas and behind all ledge walls, covering their entire height.

Provision of micro-concrete band in waterproofing and epoxy grouting in tiles

- Providing micro-concrete band at the junction of wet areas such as toilets, balconies, utilities and the adjacent rooms to prevent water seepage from wet to dry areas through tile bedding mortar.
- Spacers and epoxy grouting provided for all areas (dry and wet) as a secondary layer of protection against seepage

Using Heat Strengthened performance glasses

- All glasses are heat-strengthened, and laminated heat strengthened glass used for bottom fixed panels, prioritizing safety against impact and breakage.
- Performance glass as per IGBC Silver rating requirements given for better thermal performance

Provision of concealed secondary drain spout to drain accidentally seeped water.

- Prevents water leakage in wet areas like washrooms.
- Spout is provided in washrooms and utilities to direct water percolating through bedding mortar directly into the drain pipe

In an industry-first practice, Damp Proofing done to ensure no seepage or dampness.

- Damp proof course applied on external dead walls prior to texture and paint.
- Shower test done on external dead walls to rule away any seepage.

# Special Features

The furniture accessories, paintings, items, electronic goods, additional fittings/fixtures, decorative items, including finishing materials, specifications, shades, sizes and colour of tiles, etc. shown in the images are only indicative in nature and are only for the purpose of illustration. For Limited Units Only  
Subject to the terms and specifications & price range set out in the application form read with the AFS.

\*Includes Upper and Lower Cabinets
